

DARREN SILLS

(353) 89-422-2561 | DarrSills@gmail.com | darensills.com | [GitHub](#) | [LinkedIn](#)

Computer Science graduate with hands-on experience building responsive web applications using modern front-end technologies. Passionate about creating intuitive user experiences, writing clean, maintainable code, and continually expanding my technical skills.

EDUCATION

BSc (Hons) in Computer Science

Southeast Technological University | Waterford

- Graduated with first class honours.
- Relevant Modules: Data Structures & Algorithms, Software Architecture, Object-Oriented Design, Database Systems, Web Application Development.

Study Abroad

Shibaura Institute of Technology | Tokyo

- Global Society Member: Facilitated cross-cultural communication and language exchange alongside international and local engineering students.

PROJECTS

Coding Assistance Forum | PHP, MySQL, TailwindCSS, Figma | [\[GitHub\]](#)

- Designed user interface mock-ups and user flows in Figma before translating them into a responsive, mobile-friendly interface using TailwindCSS.
- Developed dynamic PHP functionality including user authentication, threaded discussions, and role-based permissions backed by a MySQL database.
- Structured and optimized the relational database schema to support efficient content retrieval and scalable application architecture.

Film Discovery Web Application | React, Typescript, Rest APIs, Firebase | [\[GitHub\]](#)

- Built a responsive, full-stack web application utilizing reusable, type-safe React components, deploying via Vercel with GitHub Actions (CI/CD).
- Integrated the TMDB REST API, managing complex asynchronous state and data fetching to deliver seamless, real-time search results.
- Implemented secure user authentication and a cloud-synced personal watchlist database utilizing Firebase (Firestore).

Unity Systems-Based RPG | C#, Unity, OOP, Git, Tooling | [\[GitHub\]](#)

- Engineered modular, scalable gameplay systems in C# utilizing strict object-oriented design and event-driven architecture.
- Developed custom Unity editor tools and extensions, automating repetitive level design tasks and reducing manual configuration time by an estimated 40%.

SKILLS

Languages: TypeScript, JavaScript, C#, HTML, CSS

Web & Backend: React, Node.js, WordPress, .NET / ASP.NET Core, REST APIs

Databases & Cloud: PostgreSQL, MongoDB, Firebase, AWS (EC2/S3)

Tools & DevOps: Git/GitHub, Docker, GitHub Actions (CI/CD)

ADDITIONAL

Languages: English (Native), Japanese (Conversational)

Interests: Competitive gaming (ranked globally across multiple games), video game modding, football, PC hardware, baking.
